CalBatt amongst Top 10 for Munich Cleantech Innovation Award 2014

CalBatt (www.calbatt.com) was ranked in the top 10 most interesting innovative Tech-Ventures at the MCC Innovation Award, a highly reputed event which recognizes and rewards the best European clean technology ventures.

The award ceremony has been taken place on November 20th during the 8th Munich Cleantech Conference “Energy becomes service”, the annual Cleantech industry get-together organized by Munich Network.

CalBatt, represented by Francesco A. Amoroso, Head of R&D, has been selected by the MCC expert jury to present its disruptive technology to a group of leading Investors and Companies active in the European Cleantech sector.

About Munich Network:

With a broad-based backbone in technology and industry, Munich Network is a tech-industry driven independent organization geared to promote innovation and entrepreneurship.

Munich Network is personally and directly connected with many of the most important technology centers in Germany, in Europe and internationally, by functioning as a “Matchmaker,” connecting technology enterprises and entrepreneurs with key contacts in industry and in the user community.

About CalBatt:

CalBatt develops fully customizable solutions based on the dynamical analysis and efficiency optimization of energy storage systems, for both stationary and e-mobility applications. Experimental tests carried out together with the ENEL’s Engineering and Research Division by using commercial batteries have demonstrated that CalBatt technology can allow an energy efficiency increase of up to 15% with respect to state-of-art storage management systems. CalBatt innovative technology has been awarded at the Techgarage-StartCup Calabria in 2011, and at the Enel Lab competition in 2013 by ENEL that funded the first development phase of Calbatt. Born as a spin-off of the University of Calabria (Italy) in 2012, the Company achieved the status of “innovative start-up” since 2013 and is registered in the dedicated section of the Italian Business Register.
