

CalBatt among the Energy Champions presented at the European Parliament

On April 19, Enel and Symbola will present the Research Report “**100 ITALIAN ENERGY STORIES**” to the European Parliament.

The report highlights the **best technologies of the electricity supply chain made in Italy**. It will be in the spotlight of the event hosted by the Member Simona Bonafè and the Vice-President Antonio Tajani. Ermete Realacci (President of the Symbola Foundation) and Francesco Starace (CEO of Enel SpA) will present the dossier.

CalBatt is proud to be among the Italian Energy Champions that will be brought to the attention of the European Parliament, with its pioneering technology for perfect energy storage management which will help the diffusion of clean renewable energy sources and electric vehicles across Europe.

An important recognition of the achievements of CalBatt, whose path since the Company foundation has already marked important milestones, among which **the grant and the cooperation with Enel in the Enel Lab program, several international awards** and, last but not least, **the grant by the European Commission in the H2020 SME Instrument framework as one of “the companies with the most innovative ideas in the world”**.

And is just in the framework of SME Instrument that CalBatt is working currently on the definition of strategic long-term partnerships in three strategic markets:

- ✓ **Intralogistics**, in which CalBatt is launching its solutions for electric forklifts charging in energy efficiency programs aimed at reducing carbon emissions and energy costs in industrial environments;
- ✓ **Generating sets for telecom**, in which CalBatt is bringing its technology to increase battery life and minimize gasoline consumption in telecom base stations;
- ✓ **Energy storage**, in which CalBatt is developing an advanced Energy Management System to be embedded into reliable and profitable turnkey plug&play storage kits.

Three strategic markets in which CalBatt is further strengthening its position as reference supplier of superior product solutions for higher performance and highly sustainable business cases.

Co-funded by the Horizon 2020 programme of the European Union
