About The Tech Tour:

The Tech Tour was founded in Geneva in 1998 in response to the growing interest in emerging technology companies in various European regions. The Tech Tour mission is to promote investment in the most promising technology companies in Europe through Regional Tours and Vertical Summits. Since its inception in 1998, Tech Tour companies have been very successful in obtaining funding and the company provides an important platform for Entrepreneurs. Investors, Government influencers, Industry experts and Advisers to come together network, collaborate and further innovation in Europe.

About the International Venture Club:

The International Venture Club was founded in 2011 as the collaborative platform of leading venture investors promoting successful international investments. Its objectives are to 1) share better practices, 2) build co-investor trust and relations, 3) foster new funding and investment opportunities through joint actions and PR, 4) grow promising companies with corporate partners and co-investors and 5) keep a smart window and support to emerging innovative companies.

About CalBatt:

CalBatt develops fully customizable solutions based on the dynamical analysis and efficiency optimization of energy storage systems, for both stationary and e-mobility applications. Experimental tests carried out together with the ENEL's Engineering and Research Division by using commercial batteries have demonstrated that CalBatt technology can allow an energy efficiency increase of up to 15% with respect to state-of-art storage management systems. CalBatt innovative technology has been awarded at the Techgarage-StartCup Calabria in 2011, and at the Enel Lab competition in 2013 by ENEL that funded the first development phase of Calbatt. Born as a spin-off of the University of Calabria (Italy) in 2012, the Company achieved the status of “innovative start-up” since 2013 and is registered in the dedicated section of the Italian Business Register.
